NURSING DEPARTMENT

On October 25, 2022, Nursing Students had a chance to talk to their Professors and learn more about the school and their program. At their Chat and Chew, professors and students brought different kinds of food and beverages representing different countries and representing diversity.

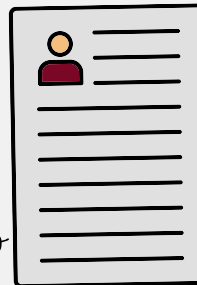

DENTAL HYGIENE DEPARTMENT

On October 24, 2022, Dental Hygiene students had the pleasure to participate in the Head Start Enrollment Community Meet and Greet. Our students participated in giving out information about our school and the services provided along with information about proper homecare and nutrition for both children and parents. Students were able to experience the positive benefits of participating in a community and to target audiences who normally don't have access to dental services.
